

RECOVER DEBT WITH SCANCAM IOU PAYMENT APP

Scancam's secure smart phone IOU payment application facilitates all of your IOU payments with the touch of a button. Motorists have the flexibility to pay their unpaid fuel debts from their mobile phone without having to return to the store.

Scancam will SMS the motorist immediately after an incident is logged. The motorist is then prompted to return to the store or click the link to pay on their phone. If payment is not received, automatic reminders are sent.

With this added flexibility and convenience more motorists are inclined to promptly pay their debt, increasing your rate of repayment.
