

**Instant theft and
raid protection**

Premises, stock and personnel secured in seconds

Most property loss occurs in the initial minutes of a break-in. Install SmokeCloak® on the premises and within seconds of a break-in the protected area is filled with an impenetrable cloud of fog. This provides an effective barrier and forces the intruders to leave the premises.

MSS Professional is the supplier of microprocessor controlled equipment which provides instant protection at the time of a break-in or day-time raid

- Protection in seconds – premises and stock are quickly secured
- Designed to integrate – use with existing electronic alarm systems
- Good investment
- No residues – does not damage equipment and is safe for people and animals
- Peace of mind – knowing premises are safe.

Patented technology applied effectively

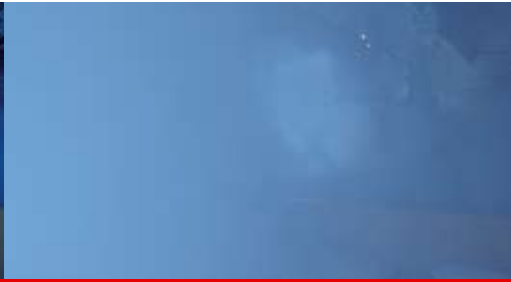

MSS Professional offers SmokeCloak® products for varied applications, from closed rooms to targeted use with vans, banks and store fronts. MSS Professional offers warehouse protection, with the SmokeCloak® placed high and out of range of vandalism.

00:15

MSS Professional uses patented technology that protects personnel and valuables. The fog density is auto-regulating, meaning that the density is constantly optimised for the protected area, even if the intruders smash windows in an attempt to disperse the fog.

Furthermore, SmokeCloak® products and consumables have undergone extensive international testing and certification. The fluids used in SmokeCloak® products are made from pharmaceuticals and food-grade glycols, meaning that the vapour is safe for humans, animals and property.

Top quality, unbeatable warranty

The SmokeCloak® systems are manufactured in an ISO 9001-2000 quality assurance certified factory. Every SmokeCloak® system carries a three year warranty. In addition, the company carries an insurance policy which provides legal protection against intruders who sue for damages

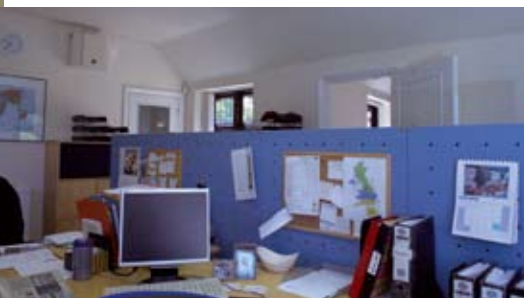

if they are injured in the fog. Interestingly, there has never been a claim!

MSS Professional Ltd. in the UK has achieved police recognition, including endorsement of the SmokeCloak® products with the "Secured by Design" police preferred specification. Furthermore, SmokeCloak® products have the best list of references in the industry. In fact, most business is generated from recommendations – recognition that MSS Professional provides the highest quality products and after sales support.

Office

Warehouse

The SmokeCloak® system from MSS Professional is designed to secure your premises and stock in the critical time gap between the alarm's activation and the response team's arrival at the scene. Extremely powerful artificial fog generators sold under the SmokeCloak® brand are constructed to work together seamlessly with existing alarm installations, providing physical protection at the moment of attack.

Defining the security fog industry

MSS Professional is the world's leading supplier of fog security systems under the SmokeCloak® brand. MSS Professional was established following the acquisition of Martin Security Smoke - the company originally known as SmokeCloak®.

SmokeCloak Ltd. effectively defined and developed the security fog industry back in the early 1990s.
